

Environmental Policy Statement

EPPH specialise in HVAC, renewable energy and Mechanical Engineering across public and private sectors.

This policy supports EPPH's approach to sustainability and describes our responsibility towards the environment. We will effectively manage and improve its environmental performance and minimise the impacts of our business on the environment. We are committed to do this by:

- Develop, implement and maintain an environmental management system that conforms to ISO 14001 and drives continual improvement at all stages.
- Ensuring compliance with all relevant environmental legislation and regulations to prevent, minimise and control pollution, and to work in compliance with the pollution prevention guidelines for construction. This includes the CDM Regulations 2015.
- Managing and monitoring any significant environmental aspects and impacts. EPPH and sub-contractors aim to minimise the impacts arising from operational works, travel and resources. We will also aim to provide training that supports best practice in this industry
- Ensuring that at all stages of our projects we are working to protect the environment in relation to preventing pollution, protecting wildlife and all specified aspects.
- Purchasing, where practical, environmentally superior products and services from supply chain partners who have demonstrated a commitment to good environmental practices.
- Setting relevant and measurable environmental targets and objectives, whilst driving continual improvement of the environmental management system to enhance environmental performance.
- Training staff, suppliers and contractors to enhance awareness of relevant environmental matters.

- Working in partnership with customers and the supply chain to promote best practice environmental management techniques
All employees have been made aware of the environmental sensitivity of the Sectors in which the company operate and seek to continually develop the company's environmental compliance and performance.

Senior Management will be responsible for implementing this policy. Successful delivery of the policy involves generating a culture that actively encourages best environmental practices and ensuring the involvement of all our people and our supply chain. This policy statement will be reviewed annually and on an adhoc basis if significant business changes occur.

This Environmental Policy is continually reviewed, whilst being driven enthusiastically by the Directors and management team.
